Army Ammunition Data Sheets for Small Caliber Ammunition (Federal Supply Class 1305)

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter or DA Form 2028 (Recommended Changes to Publications and Blank Forms) located in the back of this manual directly to Logistics Research and Engineering Directorate (AMSRD-AAR-AIL-LS), U.S. Army RDECOM, Armament Research, Development and Engineering Center, Picatinny, NJ 07806-5000. You may also send in your recommended changes via electronic mail or by fax. Our e-mail address is LSB@PICA.ARMY.MIL. Our fax number is DSN 880-4633, Commercial (973) 724-4633. A reply will be furnished to you.

THIS PAGE INTENTIONALLY LEFT BLANK

CHAPTER 1
INTRODUCTION

1-1. PURPOSE

This manual is a reference handbook published as an aid in planning, training, familiarization and identification of small arms ammunition, ranging from 22 caliber through 30 millimeter and shotgun ammunition from .410 to 10 gage. This is the Federal Supply Class 1305. Operating instructions are contained in the appropriate weapons manuals.

1-2. SCOPE

a. For each item of materiel, there are illustrations and descriptions together with characteristics and related data. Included in the related data are weights, dimensions, performance data, shipping and storage data, type classification, and logistics control code (LCC). Refer to SC 1305/30-IL for weight, dimensions and cube of packing boxes for small arms ammunition.

b. Information concerning supply, operation, and maintenance of the items will be found in the publications referenced for those items. A complete listing of these publications is maintained in DA Pam 310 series indexes.

c. Within this manual, items with the following type classifications are included:

(1) Standard (STD)

(2) Contingency (CON)

(3) Limited Procurement (LP)

(4) Reclassified obsolete (OBS) for regular Army use, but used by National Guard or Reserve Units.

(5) Reclassified . OBS for all Army use, but used by Marine Corps, Air Force or Navy.

(6) Reclassified OBS, no users, but U.S. stocks remain.

d. Items with the following type classification are not included: Reclassified OBS for all U.S. use. No U.S. stocks remain. (Foreign use or stock may remain.)

e. Numerical values, such as weights, dimensions, candlepower, etc., are nominal values, except when specified as maximum or minimum. Actual items may vary slightly from these values. Allowable limits can be obtained from the drawings indicated in the data sheets.

CHAPTER 2

SHOTGUN CARTRIDGES

THIS PAGE INTENTIONALLY LEFT BLANK

CARTRIDGE, .410, SHOTGUN, NO. M35

Type Classification:

OBS - MSR 11756003.

Use:

Rifle/Shotgun, Caliber .22/.410 Bore, Survival, M6. The cartridge is intended for use in survival weapons against small game.

Description:

The cartridge case is all aluminum, and is loaded with smokeless powder and No. 6 copper-coated lead shot.

Tabulated Data:

DODAC...............................1305-A055
UNO serial number 0012
UNO proper shipping
  name ....Cartridges for weapons, inert projectile
Weight ....430 gr

THIS PAGE INTENTIONALLY LEFT BLANK

CARTRIDGE, 10 GAGE, SHOTGUN, BLANK

Type Classification:

STD - OTCM 36524.

Use:

This is an optional use item for reveille and retreat salutes, and is fired in the 3-inch gun, 75mm gun, 75mm howitzer, or 105lmm howitzer.

Description:

The cartridge is similar to standard shotgun cartridges but it contains no lead shot. It has a paper cartridge case. The forward closing disc is marked "BLANK."

Function:

The cartridge is designed to produce a noise when initiated. It is used as a salute item in large caliber weapons. The blank is inserted either in a prepared cartridge case or in a breech block of the weapon being used.

Tabulated Data:

DODAC...............................1305-A010

CARTRIDGE, 12 GAGE SHOTGUN, NON-LETHAL: POINT CONTROL, M1012

Type Classification:

STD - Sep 2000.

Use:

This cartridge is used by military forces to protect key facilities or for crowd control using non-lethal force. It gives the soldier the capability to stun or deter an individual by delivering a strong blow to the body without penetrating the body. The M1012 is be fired from standard military 12 gage shotguns (Mossberg 500/590 and Winchester 1200). The effective range is 10 to 20 meters.

Description:

The M1012 has a clear cylindrical case and is loaded with a rubber fin stabilized projectile.

Functioning:

WARNING

DO NOT FIRE THE M1012 AT INDIVIDUALS CLOSER THAN 10 METERS. DEATH OR SERIOUS INJURY MAY OCCUR.

DO NOT FIRE THE M1012 ABOVE THE SHOULDER OF AN INDIVIDUAL. DEATH OR SERIOUS INJURY MAY OCCUR.

DO NOT SKIP FIRE THE M1012 TOWARDS AN INDIVIDUAL. SERIOUS INJURY MAY OCCUR.

THE M1012 MUST BE FIRED IN OPEN OR WELL VENTILATED AREAS TO PREVENT TOXIC FUME BUILDUP.

ALL PERSONNEL WITHIN 10 METERS OF WEAPON MUST WEAR SINGLE HEARING PROTECTION.

DURING TRAINING, DO NOT FIRE THE M1012 AT LIVE TARGETS. THE M1012 CAN BE LETHAL IF IMPROPERLY USED.

DURING TRAINING, EYE PROTECTION IS RECOMMENDED TO PROTECT GUNNER FROM PROJECTILE BOUNCE BACK.

Tabulated Data:

Cartridge:	
NSN	1305-01-470-2405

CARTRIDGE, 12 GAGE SHOTGUN, NON-LETHAL: CROWD DISPERSAL, M1013

AR9858

Type Classification:

STD - Sep 2000.

Use:

This cartridge is used by military forces to protect key facilities or for crowd control using non-lethal force. It gives the soldier the capability to stun or deter an individual by delivering a strong blow to the body without penetrating the body. The M1013 is be fired from standard military 12 gage shotguns (Mossberg 500/590 and Winchester 1200). The effective range is 10 to 20 meters.

Description:

The M1013 has a clear cylindrical case and is loaded with 18 rubber balls between an upper and lower wad.

Functioning:

WARNING

DO NOT FIRE THE M1013 AT INDIVIDUALS CLOSER THAN 10 METERS. DEATH OR SERIOUS INJURY MAY OCCUR.

DO NOT FIRE THE M1013 ABOVE THE SHOULDER OF AN INDIVIDUAL. DEATH OR SERIOUS INJURY MAY OCCUR.

DO NOT SKIP FIRE THE M1013 TOWARDS AN INDIVIDUAL. SERIOUS INJURY MAY OCCUR.

THE M1013 MUST BE FIRED IN OPEN OR WELL VENTILATED AREAS TO PREVENT TOXIC FUME BUILDUP.

ALL PERSONNEL WITHIN 10 METERS OF WEAPON MUST WEAR SINGLE HEARING PROTECTION.

DURING TRAINING, DO NOT FIRE THE M1013 AT LIVE TARGETS. THE M1013 CAN BE LETHAL IF IMPROPERLY USED.

DURING TRAINING, EYE PROTECTION IS RECOMMENDED TO PROTECT GUNNER FROM PROJECTILE BOUNCE BACK.

Tabulated Data:

Cartridge:	
NSN	1305-01-470-2139

CARTRIDGE, 12 GAGE SHOTGUN: BREACHING, M1030

TYPE CLASSIFICATION:

STD

USE:

This cartridge is used to gain access through light doors and entryways. It is used with a standard shotgun.

DESCRIPTION:

The M1030 contains a frangible slug consisting of powdered steel with a wax binder. The cartridge is 2.45 inches long with a diameter of 0.88 inches.

FUNCTIONING:

When the percussion primer is struck, the propellant is ignited. The propelling gases expel the frangible slug against a target. The slug transmits the force over a specific area, such as a hinge or lock mechanism, without producing significant fragmentation that could injure the gunner.

TABULATED DATA:

NSN	1305-01-475-7440
DODAC	1305-AA54
Complete Round:	
Type	Breaching
Weight	TBD
Length	2.45 in.
Diameter	0.88 in.
Weapons used with	Mossberg, LSS
Projectile:	
Filler material	Powdered steel
Ogive	Plastic
Color	Clear
Weight	40 g
Fuze	None
Propelling Charge:	
Cartridge case	Brass case
Propellant	Herco, 23 gr (1.5 g)
Primer	Percussion, WIN 209

PERFORMANCE:

Maximum effective range	5 m
Muzzle velocity	350 m/s

TEMPERATURE LIMITS:

Firing:	
Lower limit	-25°F
Upper limit	+120°F
Storage:	
Lower limit	-65°F
Upper limit	+120°F

DRAWINGS:

Cartridge	12990872
Packing	9396197

UNIT OF ISSUE:

Packing	160 rounds per M2A1 metal container; 2 containers per wire-bound box

PACKING DATA:

*Packing Box:

Weight	53 lb
Dimensions	14.53 x 12.75 x 8 in.
Cube	0.85 cu ft

*See DOD Consolidated Ammunition Catalog for complete packing data including NSNs.

SHIPPING AND STORAGE DATA:

Hazard class/division and SCG	1.4S
DOT designation	CARTRIDGES FOR WEAPONS, INERT PROJECTILE
UN Identification No.	0012

LIMITATIONS:

Breaching capability has been demonstrated effectively against 1-3/4 inch solid wood doors. Adequate testing has not been accomplished to determine the effectiveness against metal doors.

REFERENCES:

SB 700-20
TM 9-1305-201-20&P
TM 9-1305-201-34

WARNING

The M1030 is only authorized for use with the Mossberg 590 and the Lightweight Shotgun System (LSS).

Personnel using the M1030 and individuals in close proximity must wear double hearing protection.

Personnel in close proximity to breaching activities shall wear eye protection. Full face masks are recommended.

Do not fire cartridges from a shotgun whose muzzle is less than 2.75 inches from the target.

Fire from open, well ventilated areas.

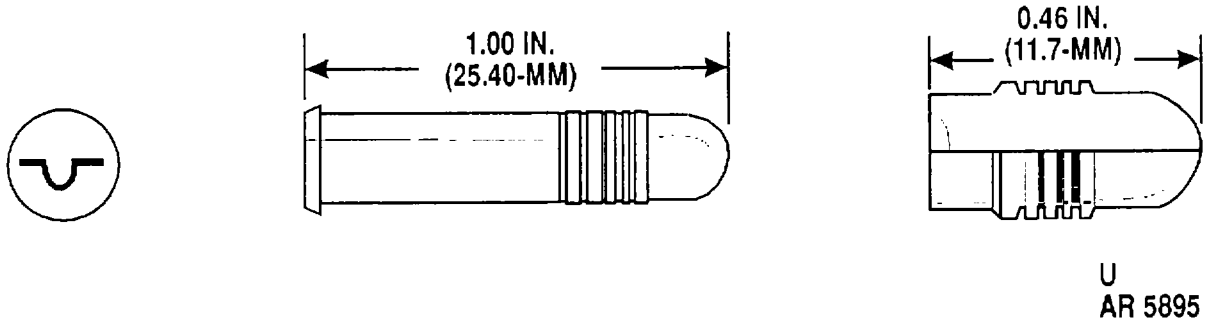

Follow standard misfire procedures for shotguns.

CHAPTER 3

CALIBER .22 CARTRIDGES

CARTRIDGE, CALIBER .22, TRACER, LONG RIFLE, M861

Type Classification:

STD - DA Letter.

Use:

Rifle M16A1 when adapted with the M261 Conversion Kit. The M861 cartridge, when fired from the rim-fired adapter M16A1 Rifle mounted on the Brewster Device, will increase the training proficiency in scaled range tank gunnery exercise by providing a visual display for tracking purposes.

Description:

TRACER Cartridge. The cartridge M861, .22 Caliber Long Rifle, rimfire with tracer is a commercially produced item, manufactured by Dynamite Nobel AG. The M861 is designed to be fired in the M16A1 rifle when adapted with the M261 Conversion Kit. It can be fired in the automatic or semi-automatic modes. The tracer (red) is visible between 27 and 192 feet in daylight to allow the gunner to observe and sense the impact of the tracer with normal vision and sighting devices when fired on the scaled range. The M861 is identified by a red painted tip.

CARTRIDGE, CALIBER .30, ARMOR PIERCING INCENDIARY, M14

U
AR 5907

Type Classification:

OBS - MSR 11756003.

Use:

Machine Guns, Caliber .30, M37, M1919A4 and M1919A6; and Rifle, Caliber .30, M1.

Description:

ARMOR PIERCING INCENDIARY Cartridge. The cartridge is identified by an aluminum bullet tip.

FUNCTION:

Penetration, fired at a 7/8-inch steel plate at 100 yards, will not be less than 0.42 inch. Upon impact with a target, the incendiary composition bursts into flame and will ignite flammable material.

Tabulated Data:

DODAC.. 1305-A202

CARTRIDGE, CALIBER .30, BALL, FRANGIBLE, M22

U
AR 5908

Type Classification:

OBS - MSR 11756003.

Use:

Machine Guns, Caliber .30, M37 and M1919A4; and Rifle, Caliber .30, M1.

Description:

BALL Cartridge. The cartridge is identified by a green bullet tip with a white ring to the rear of the green color.

Function:

The bullet disintegrates upon striking a hard or armored target, leaving a pencil-like mark to indicate a hit during gunnery practice.

Tabulated Data:

DODAC..1305-A220

CARTRIDGE, CALIBER .30, TRACER, M25

U
AR 5909

Type Classification:

OBS - MSR 11756003.
Use:

Machine Guns, Caliber .30, M37, M1917A1, M1919A4, and M1919A6; and Rifle, Caliber .30, M1. The cartridge is intended for use against personnel and unanmored targets.

Description:

TRACER Cartridge. The cartridge is identified by an orange bullet tip.

Function:

In flight, the bullet exhibits a trace of full luminosity from a point not greater than 75 yards from the muzzle of the weapon to a point not less than 900 yards from the muzzle.

Tabulated Data:

DODAC..1305-A230

CARTRIDGE, DUMMY, CALIBER .30, M40

Type Classification:

STD - OTCM 37119.

Use:

All caliber .30 weapons except carbine. The cartridge is inert, and is used for practice in loading weapons, for simulated firing to detect flinching of personnel when firing, and for inspecting and testing the mechanisms of small arms weapons.

Description:

DUMMY Cartridge. The cartridge is identified by six 1-inch longitudinal corrugations (flutings) in the cartridge case. In addition, there is no primer.

CARTRIDGE, CALIBER .38, WAD CUTTER

Type Classification:

Commercial.

Use:

Revolver, Special, S & W, K-38. The cartridge is used only in pistol competition firing and marksmanship training.

Description:

WAD CUTTER Cartridge.

Function:

The bullet is designed with a concave forward end to act as a paper punch cutting a clean hole in targets.

Tabulated Data:

DODAC	1305-A404
UNO serial number	0012

CARTRIDGE, CALIBER .45, LINE THROWING, M32

Type Classification:

STD A - OTCM 36841.

Use:

Line Throwing Gun, Caliber .45/.70.

Description:

LINE THROWING Cartridge. The cartridge is composed of a brass case, primer, commercial smokeless powder; and two felt wads coated on both sides with gummed paper. The wads are sealed with red lacquer. The cartridge case mouth is crimped to prevent entry of the line throwing rod.

Function:

The line throwing rod is placed in the weapon barrel. Cartridge initiation provides pressure to force the rod out of the barrel and propel the line to the target.

CARTRIDGE, CALIBER .50, BLANK, M1

Type Classification:

CONT - OTCM 36841.

Use:

Machine Gun, Caliber .50, M2 (flexible only). The cartridge is used to simulate firing in training exercises.

Description:

BLANK Cartridge. The cartridge is identified by the absence of a bullet and has crimped cartridge case mouth.

Tabulated Data:

DODAC	1305-A558
UNO serial number	0338
UNO proper shipping name	Cartridges for weapons, blank
Weight	917 gr
Length	3.91 in. (99.3 mm)
Tracer	NA
Primer	Percussion
Fuze	NA

Explosive:	
Type	NA
Weight	NA
Incendiary:	
Type	NA
Weight	NA
Propellant:	
Type	WC 150
Weight	46 gr

CARTRIDGE, CALIBER .50, INCENDIARY, M1

U
AR 5927

Type Classification:

OBS - MSR 11756003.

Use:

Machine Guns, Caliber .50, M2 and M85.

Description:

INCENDIARY Cartridge. The cartridge is identified by a blue bullet tip.

Function:

Upon impact with a hardened or armored target, the incendiary composition bursts into flame and will ignite any flammable material.

Tabulated Data:

DODAC -------------------------------1305-A562

CARTRIDGE, CALIBER .50, BLANK, M1A1

Type Classification:

STD - MSR 02806015.

Use:

Machine Gun, Caliber .50, M2 with the M19 Blank Ammunition Firing Attachment; and Machine Gun, Caliber .50, M85 with the M20 Blank Firing Attachment. The cartridge is used to simulate firing in training exercises.

Description:

BLANK Cartridge. The cartridge is identified by the absence of a bullet. The M1A1 differs from the M1 in that the M1A1 has a rosette crimp at the mouth. Also, the M1A1 is loaded with Dupont Hi Skor 700X propellant.

Tabulated Data:

DODAC	1305-A559

CARTRIDGE, CALIBER.50, BALL, SPOTTER-TRACER, M48A1

Type Classification:

STD - AMCTC 7378.

Use:

Rifle, Spotting, Caliber .50, M8C.

Description:

BALL Cartridge. The cartridge has specific features which aid in identification. The cartridge case has a distinctive body design which prevents chambering in other weapons. The total length is only 4.5 inches in comparison with 5.5 inches for a standard round. The bullet has a yellow tip with a red ring to the rear of the yellow tip.

Function:

In flight, the bullet exhibits a visible trace from a point not greater than 100 yards from the muzzle of the weapon to a point not less than 1,500 yards from the muzzle. The bullet will detonate and produce a flash and a puff of smoke upon impact against a steel plate placed at 175 yards from the muzzle of the weapon at all angles from 90° to 11° with respect to the horizontal.

Difference Between Models:

The M48A1 differs from the M48A2 in that the M48A1 has a primer in the point of the bullet.

Tabulated Data:

STD - 31 March 1993.

Use:

Machine Gun, Caliber .50, M2HB. The cartridge is to be used by soldiers equipped with M2 machine guns.

Description:

COMBAT Cartridge. The cartridge is identified by a red sabot (Ultem 1000).

Tabulated Data:

DODAC	1305-A518
UNO serial number	0012
UNO proper shipping name	Cartridges for weapons, inert projectile
Weight	1466 gr
Length	5.45 in. (138.4 mm)
Tracer	R543
Primer	Percussion
Fuze	NA
Explosive:	
Type	NA
Weight	NA
Incendiary:	
Type	NA
Weight	NA
Propellant:	
Type	WC 856
Weight	282 gr
Projectile:	
Weight	350-360 gr

Performance:

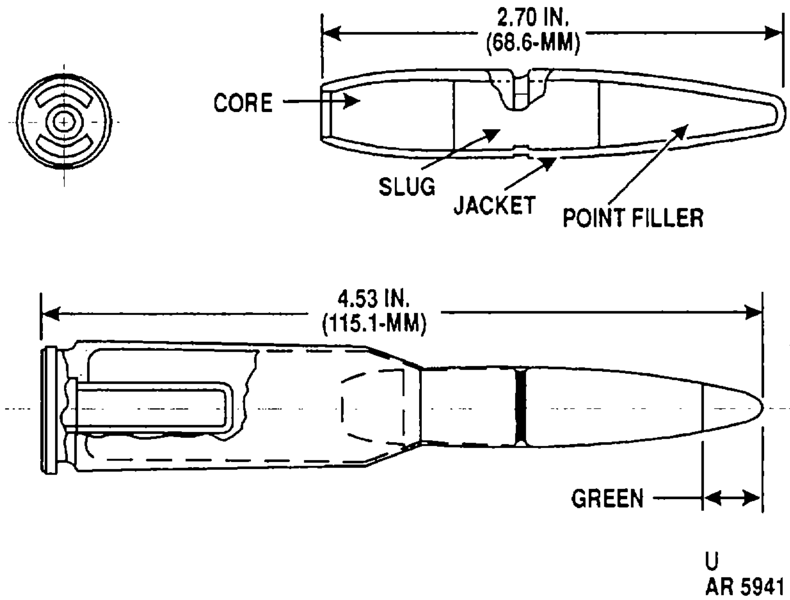

Chamber pressure	55,000 psi
Velocity	4000 fps, 78 ft from muzzle

Shipping and Storage Data:

Quantity-distance class/ SCG	1.4
Storage code	C
DOT shipping class	C
DOT designation	CARTRIDGES SMALL ARMS UN0339

THIS PAGE INTENTIONALLY LEFT BLANK

CARTRIDGE, CALIBER .50, BALL, PRACTICE, T249E2

Type Classification:

Not applicable.

Use:

Rifle, Spotting, Caliber .50, M8C. The cartridge is used as a less expensive substitute for the M48 series spotter-tracer cartridges. The item uses a small amount of Sodium Carbonate Monohydrate as its spotting charge. It is similar to using a flour bag as a bomb.

Description:

BALL Cartridge. The cartridge is a duplicate of the M48 series cartridges, a less expensive model used for practice. It is identified by a green bullet tip. It has no tracer or incendiary filler.

Tabulated Data:

CARTRIDGE, CALIBER .50: ARMOR PIERCING INCENDIARY (API), MK 211 MOD 0

Type Classification:

Std - Feb 96 (for U.S. Army).

Use:

M2 Machine Gun.

Description:

Armor Piercing Cartridge. This cartridge is identified by green bullet tip identification paint. The projectile consists of a brass jacket surrounding a steel body and tungsten core with incendiary and high explosive charges.

Purpose:

This cartridge provides improved penetration performance against enemy personnel and light armor vehicles.

Tabulated Data:

DODAC (Navy) 1305-01-250-8162, A606; 1305-01-249-6888, A607; 1305-01-251-2581, A608

CARTRIDGE, 5.56MM, GRENADE, M195

Type Classification:

STD - AMCTC 6919.

Use:

Rifles, 5.56mm, M16 and M16A1.

Description:

GRENADE Cartridge. The cartridge is identified by a rose-petal (rosette-crimp) closure of the cartridge case mouth sealed with red lacquer.

Function:

The cartridge provides pressure, on functioning, to project grenades to a desired target using a grenade projection adapter.

Tabulated Data:

DODAC...............................1330-G841

CARTRIDGE, DUMMY, 5.56MM, M199

Type Classification:

STD - AMCTC 4662.

Use:

Rifles, 5.56mm, M16 and M16A1. The cartridge is used for practice in loading 5.56mm weapons, for simulated firing to detect flinching of personnel when firing, and for inspecting and testing the weapon mechanisms.

Description:

DUMMY Cartridge. The cartridge is identified by six longitudinal corrugations (flutings) in the cartridge case and there is no primer.

THIS PAGE INTENTIONALLY LEFT BLANK

CARTRIDGE, 5.56MMN, BLANK, M755

Type Classification
STD - MSR 04786005.

Use:

The M755 blank cartridge is especially designed for use with the Sting Ring Airfoil Munition System which consists of the M234 launcher and the 64mm riot control M743 projectile fired from the M1GA1 rifle.

Description:

BLANK Cartridge. The cartridge is only for use-with -the M234 riot control 64lmm projectile launcher. The launcher is attached to the flash suppressor of the M16A1 rifle and actuated by firing an M755 5.56Gmim blank cartridge. The M755 blank cartridge is the only cartridge that will give the projectile M743 the proper velocity. Use of other blank cartridges may damage the system.

The cartridge is loaded with 12 grains of Dupont Hi Skor 700X propellant closed with a seven petal nose crimp and moisture sealed. The crimped tips of the cartridge is painted with yellow lacquer for identification and thus lessen the chance of mixing them with the standard M16AI rifle blank cartridges.

Function:

The blank cartridge is fed into the firing chamber. When fired, the primer ignites the propellant. The expanding propellant ,gases pass fiom the muzzle of the rifle into the launcher manifold. The projectile is ejected from the launcher barrel. The propellant charge is not sufficient to eject the cartridge case which must be ejected by pulling the charging handle of the rifle all the way back.

CARTRIDGE, 7.62MM, TRACER, M62

Type Classification:

CON - MSR 11756003.

Use:

Machine Guns, 7.62mm, M60, M219 and M240; and Rifle, 7.62mm, M14. The tracer is intended to permit visible observation of the bullet's in-flight path or trajectory to the point of impact.

Description:

TRACER Cartridge. The cartridge is identified by an orange bullet tip.

Tabulated Data:

CARTRIDGE, 7.62MM, TRACER, M62 (OVERHEAD FIRE MISSION)

Type Classification:

CON - MSR 11756003.

Use:

Machine Guns, 7.62mm, M60, M219 and M240; and Rifle, 7.62mm, M14. The cartridge is used in weapons for firing over the heads of troops being trained in field exercises. Stringent production control and screening of ammunition lots ensure the safety of personnel operating immediately below the trajectory of the fired bullets.

Description:

TRACER Cartridge. The cartridge is identified by a red bullet tip.

Tabulated Data:

CARTRIDGE, DUMMY, 7.62MM, M63

Type Classification:

STD - OTCM 36841.

Use:

Machine Guns, 7.62mm, M60, M219 and M240; and Rifle, 7.62mm, M14. The cartridge is used for practice in loading 7.62mm weapons for simulated firing to detect flinching of personnel during firing and for inspecting and testing the weapon mechanism.

Description:

DUMMY Cartridge. The cartridge is identified by six longitudinal corrugations (flutings) on the cartridge case. There is no primer and no vent hole in the primer pocket.

CARTRIDGE, 7.62MM, GRENADE, M64

Type Classification:

OBS - MSR 11756003.

Use:

Rifle, 7.62mm, M14.

Description:

GRENADE Cartridge. The cartridge is identified by a rose-petal (rosette-crimp) closure of the cartridge case mouth and sealed with red lacquer.

Function:

The cartridge provides pressure upon functioning to project rifle grenade to a desired target when using a grenade projectile adapter and dragon missile launch effect trainer (LET).

CARTRIDGE, 7.62MM, FRANGIBLE, M160

Type Classification:

STD - AMCTC 2186.

Use:

Machine Guns, 7.62mm, M219 and M240. The cartridge is designed for firing single shots in the machine gun for gunnery practice.

Description:

FRANGIBLE Cartridge. The cartridge is identified by a green bullet tip with a white ring to the rear of the green tip.

Function:

The frangible bullet, upon striking a target, disintegrates, leaving a mark at the point of impact. It is not to be fired on indoor ranges unless they are well ventilated to prevent the buildup of bullet "dust," which is toxic.

CARTRIDGE, 9MM, MK243 MOD 0, JACKETED HOLLOW-POINT

Type Classification:

STD A, June 2002.

Use:

The cartridge is intended for use against personnel. It is to be used by the Criminal Investigation Command Units (USACIDC) in situations where high lethality and limited over-penetration of the target are necessary to meet the mission profile.

NOTE

THE USE OF THIS CARTRIDGE IS LIMITED TO USACIDC UNITS ONLY, LOCATED IN THE UNITED STATES AND ITS TERRITORIES. THIS CARTRIDGE CANNOT BE ISSUED TO UNITS DEPLOYING OUTSIDE THE UNITED STATES OR ITS TERRITORIES.

THE CARTRIDGE CAN BE FIRED FROM THE M9 PISTOL (BARETTA), M11 PISTOL (SIGARMS INC.), HECKLER AND KOCH (H&K), MP5 SUBMACHINE GUN, H&K P9S PISTOL, AND SIGARMS INC. P226 PISTOL. USACIDC USE WOULD BE EXCLUSIVE TO THE M11 PISTOL.

Description:

The MK243 MOD 0 cartridge has a hollow point bullet tip.

Tabulated Data:

Cartridge design type	Anti-personnel
DODAC	1305-A260
NSN	1305-01-357-8488
Weight	147 gr
Length	1.10M50 in.max
Tracer	NA
Primer	Percussion
Fuze	NA
Explosive:	
Type	NA
Weight	NA
Incendiary:	
Type	NA
Weight	NA
Propellant:	
Type	Hercules type 84/ Winchester WPR-293
Weight	4.7 gr
Projectile weight	

Performance:

Accuracy:
The cartridge will have an extreme spread of 3.5 inches at 50 yards from a five round group (fired from a 4 in. barrel).

Penetration:
The cartridge will have a 6 inch minimum penetration when fired into ordnance gelatin (10% by weight) at 15 feet from the muzzle.

Expansion:
The cartridge will have a .50 inch minimum expansion when fired into ordnance gelatin (10% by weight) at 15 feet from the muzzle.

Shipping and Storage Data:

Coast Guard class	1
DOD hazard class	1.4
DOD transportation class	C
Firefighting group	1
Storage compatibility group	S
UNO no.	0012
Proper shipping name	Cartridge for Weapons, Inert Projectile
DOT designation	Small Arms Ammunition
Drawing no.	7232152
Package nominal overall height	1.50 in. Shipping container
Package nominal overall length	12.03 in. Shipping container
Package nominal overall width	6.09 in. Shipping Container
Net explosive weight	0.00007 Shipboard pounds; 0.0007 Transportation pounds
Unpackaged unit weight	0.03 pounds

Packaging Data:

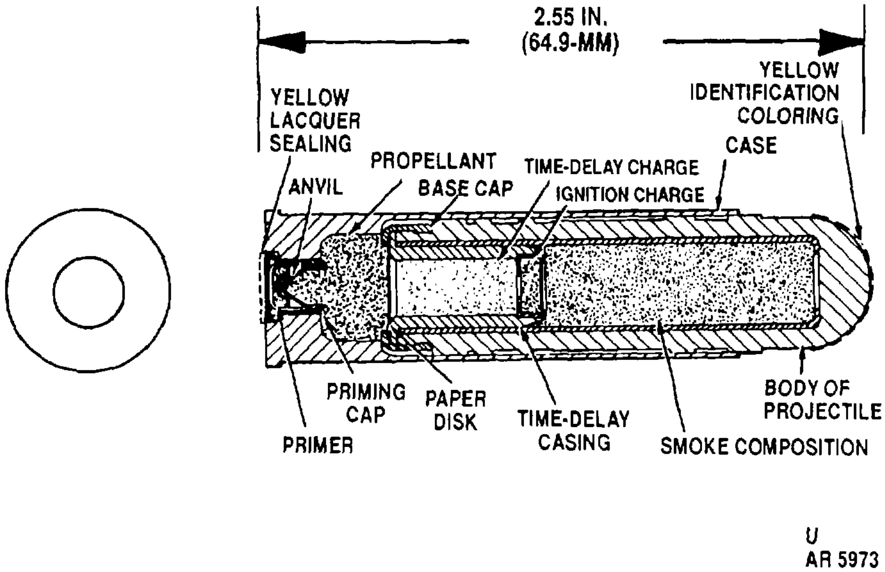

Carton box	50 rounds/box, 20 boxes/M2A1 container (1000 rounds per M2A1)
M2A1 containers	2- M2A1 containers/wirebound box, 36 wirebound boxes/pallet (72,000 rounds /pallet)

14.5 MM CARTRIDGES

THIS PAGE INTENTIONALLY LEFT BLANK

CARTRIDGE, 14.5 MM, TRAINER-SPOTTER, M181A1

Type Classification:

STD - AMCTC 138.

Use:

Artillery Trainer, M31.

Description:

TRAINER-SPOTTER Cartridge. The cartridge has a chemical-filled (smoke composition) projectile. It is identified by the markings on the cartridge case and a yellow projectile tip. The cartridge has no fuze and it uses a time delay element to provide an air burst.

Function:

When the cartridge is fired, the heat of the propellant gases ignites the delay element. The delay element burns 3 seconds and, in turn, ignites the smoke composition. The heat and pressure produced by the burning filler rupture the plastic closing disc at the projectile base and a visible puff of smoke is emitted.

CARTRIDGE, 14.5 MM, TRAINER-SPOTTER, M183A1

U
AR 5975

Type Classification:

STD - AMCTC 138.

Use:

Artillery Trainer, M31.

Description:

TRAINER-SPOTTER Cartridge. The cartridge consists of a cartridge case, a chemical filled (smoke composition) projectile, and a fuze with a small explosive charge to provide a visible and audible verification at point of impact. The cartridge is identified by the markings on the cartridge case and a yellow projectile tip.

Function:

The projectile impacts with the target. The point detonating fuze functions and an explosion charge within the fuze ignites the smoke composition and ejects it out the base of the projectile.

CARTRIDGE, 20 MM, ARMOR PIERCING INCENDIARY-TRACER, M52R1

Type Classification:

STD - OI'CM 37404.

Use:

Guns, 20mm, M39, M61 and M195. The cartridge is used against moderately armed targets and when incendiary effect is needed.

Description:

ARMOR PIERCING INCENDIARY-TRACER Cartridge. The armor piercing shot is the main part of the projectile. The ballsitic cap (ogive) contains an incendiary composition. The cartridge is identified by a projectile painted black with red markings.

Function:

The nose/ogive of the projectile impacts with the target and ruptures, and the incendiary composition ignites upon exposure to the air.

Tabulated Data:

CARTRIDGE, 20 MM, BALI,, HIGH PRESSURE TEST, M54A1

Type Classification:

STD - AMCTC 6899.

Use:

Guns, Automatic, 20mm, M39 and M61 chambered for the M103 case configuration. The cartridge is used for proof testing of 20mnl weapons and barrels during manufacture and repair.

Description:

BALL Cartridge. The cartridge is a solid steel projectile, under cut behind the ogive to control projectile weight, for developing high chamber pressure. The cartridge is identified by a stannic-stained (silvered) cartridge case.

Tabulated Data:

DODAC	1305-A892

CARTRIDGE, 20MM, TARGET PRACTICE, M55A2

U
AR 5980

Type Classification:

STD - AMCTC 7741.

Use:

Guns, 20mm, M39, M61 and M68. The cartridge is a training round intended as a substitute for a service round to be used in target practice.

Description:

TARGET PRACTICE Cartridge. The one piece projectile cavity is hollow. The nose (ogive) made of aluminum or steel is swaged to the projectile body. The projectile is painted blue with markings in black. It consists of a solid projectile without a fuze.

Function:

The projectile is inert, therefore no specific function takes place upon impact except penetration of the target.

Tabulated Data:

DODAC	1305-A897
UNO serial number	0339
UNO proper shipping name	Cartridges for weapons, inert projectiles

THIS PAGE INTENTIONALLY LEFT BLANK

CARTRIDGE, 20MM, HIGH EXPLOSIVE INCENDIARY, M56A3/M56A4

Type Classification:

M56A3: STD - LCC-B, MSR 03816015.
M56A4: STD - LCC-A, MSR 03816015.

Use:

Guns, 20mm, M39, M61, M168 and M195. The cartridge is for use against ground targets, including lightly armored vehicles, functioning with both explosive and incendiary effect. The projectile consists of a high explosive incendiary (HEI) charge and is assembled with the M505A3 fuze.

Description:

HIGH EXPLOSIVE INCENDIARY Cartridge. The projectile is thin-walled steel. A base plate is attached to the projectile to prevent ignition of the incendiary mixture by the propellant gases. A point-detonating (PD) fuze is screwed into the nose of the projectile.

Function:

The M505A3 fuze is a point-detonating, single-action fuze intended to function upon impact with the target.

Difference Between Models:

The models differ in the method of loading the projectiles. The M56A3 has the HE mix and the incendiary mix combined in one pellet. The M56A4 has the incendiary pellet inserted into the projectile, then the HE mix pellet is added. This improves fire start capability.

Tabulated Data:

DODAC	1305-A890
UNO serial number	0321

CARTRIDGE, 20MM, ARMOR PIERCING-TRACER, M95

U
AR 5982

Type Classification:

CON - OTCM 36841.

Use:

Guns, 20mm, M3 and M24A1.

Description:

ARMOR PIERCING-TRACER Cartridge. The projectile is a solid shot type, made from bar or forged steel. A steel windshield is crimped to the forward part of the projectile body. The base of the projectile contains a red tracer composition.

Function:

When the primer is initiated, the propellant ignites. Ignition of the propellant ignites the tracer composition in the base of the projectile. The tracer burns the first 2.25 seconds of projectile flight, or an approximate range of 1,400 yards.

CART'RIDGE, 20MM, INCENDIARY, M96

Type Classification:

CON - OTCM 36841.

Use:

Guns, 20mm, M3 and M24A1.

Description:

INCENDIARY Cartridge. The body of the projectile is made from cold dracon steel. The projectile nose and body are filled with incendiary composition.

Function:

Impact with the target by the projectile produces compression of the heat and friction sensitive elements in the incendiary mixture causing ignition of the mixture.

Tabulated Data:

DODAC	1305-A776
UNO serial number	0009

CARTRIDGE, 20MM, HIGH EXPLOSIVE INCENDIARY, M97A2

Type Classification:

STD - AMCTC 4376.

Use:

Gun, 20mm, M24A1.

Description:

HIGH EXPLOSIVE INCENDIARY Cartridge. The projectile has a hollow body filled with an incendiary composition and a high explosive (called RDX). The base of the projectile has a base cover and the forward end has a point-detonating (PD) fuze.

Function:

When the primer is initiated, the propellant ignites. Ignition of the propellant provides hot gases to propel the projectile from the weapon. Upon impact, the point detonating fuze functions, initiating the high explosive filler and dispersing the incendiary composition.

Tabulated Data:

DODAC	1305-A845

CARTRIDGE, 20MM, HIGH EXPLOSIVE INCENDIARY, M210

Type Classification:

STD - AMCTC 5433.

Use:

Guns, 20mm, M3 and M24A1. The projectile is effective against aircraft and other targets that are not heavily armored.

Description:

HIGH EXPLOSIVE INCENDIARY Cartridge. The cartridge has a yellow painted projectile body with a red band, approximately ¼ inch wide, at forward end. The projectile has a steel body with a cavity filled with RDX and aluminum and a point-detonating (PD) bore-safe fuze.

Function:

The projectile fuze arms in flight. Upon impact, the fuze detonates the projectile causing fragmentation of the body with an incendiary effect.

CARTRIDGE, 20MM, TARGET PRACTICE-TRACER, M220

Type Classification:

STD - AMCTC 7404.

Use:

Guns, 20mm, M39, M61 and M168. The cartridge is for practice and training.

Description:

TARGET PRACTICE-TRACER Cartridge. The cartridge is ballistically and physically identical to the M55A2 cartridge except that a tracer element has been added to the base of the projectile. The projectile is painted blue with orange colored markings.

Function:

The projectile is similar to the M56A3 projectile, but has no high explosive incendiary charge and is assembled with a dummy fuze. The projectile does contain a tracer composition which burns visibly for a minimum of 1.9 seconds.

Tabulated Data:

DODAC	1305-A651
UNO serial number	0339
UNO proper shipping name	Cartridges for weapons, inert projectiles
Weight	3935 gr

THIS PAGE INTENTIONALLY LEFT BLANK

CARTRIDGE, 20MM, HIGH EXPLOSIVE INCENDIARY-TRACER, M242/M242A1

Type Classification:

M242: STD - AMCTC 6445.
M242A1: No Army requirement.

Use:

Guns, 20mm, M39 and M61.

Description:

HIGH EXPLOSIVE INCENDIARY-TRACER Cartridge. The cartridge has the same basic structure as the M56A3 cartridge with the addition of a tracer element.

Function:

The projectile has the same function as the M56A3 high explosive incendiary (HEI) cartridge projectile. The tracer is ignited by the propellant when the round is fired.

Difference Between Models:

The models differ in the method of loading the projectiles. The M242 has the HE mix and the incendiary mix combined in one pellet with the tracer mix added at the base of the projectile. The M242A1 projectile has the incendiary loaded as a separate pellet and the HE mix is also loaded as a separate pellet, then the tracer pellet is added. This improves fire start capability.

Tabulated Data:

DODAC	1305-A659
UNO serial number	0321
UNO proper shipping name	Cartridges for weapons, with bursting charge
Weight	3865 gr
Length	6.615 in. (168.02 mm)

CARTRIDGE, 20MM, HIGH EXPOSIVE INCENDIARY-TRACER, SELF-DESTROYING, M246/M246A1

Type Classification:

M246: STD - LCC-B MSR 03816015.
M246A1: STD - LCC-A MSR 03816015.

Use:

Gun, 20mm, M168. The cartridge is for use against aerial targets.

Description:

HIGH EXPLOSIVE INCENDIARY-TRACER, SELF-DESTROYING Cartridge.

Function:

The cartridge is assembled with an M505A3 point-detonating (PD) fuze. The projectile, in addition to the M505A3 fuze, consists of a high explosive incendiary (HEI) charge, self-destroying (SD) relay charge, and a tracer charge. These charges form the SD chain. The tracer burns for about 3 to 7 seconds, whereupon the relay charge is ignited which detonates the HEI charge low order. If impact with target occurs prior to self-destruction, the M505A3 fuze causes the HEI charge to detonate high order.

Difference Between Models:

The basic difference between the models is in the loading of the projectiles. In the M246 projectile, the incendiary mix and the HE mix are combined in one pellet. In the M246A1 projectile, the incendiary is loaded as a separate pellet. The HE mix is also loaded as a separate pellet along with the SD relay charge pellet and the tracer charge pellet. This improves fire start capability.

CARTRIDGE, 20MM, HIGH EXPLOSIVE INCENDIARY-TRACER, M599 FUZE POINT-DETONATING SELF-DESTROYING M594

Type Classification:

STD - AMCTC 6391.

Use:

Gun, M139.

Description:

HIGH EXPLOSIVE INCENDIARY-TRACER Cartridge. The cartridge has a point-detonating (PD) self-destroying (SD) fuze M594. The projectile is a hollow body filled with 120 grams of high explosive incendiary (HEI) mixture with a tracer tablet at the base and the PD SD fuze screwed onto the nose.

Function:

When fired, the weapon firing pin initiates the primer which ignites the propelling charge. Gases produced by the burning propellant propel the projectile. The projectile shall function with high order detonation upon impact or, if the projectile does not impact on intended target within 4 to 7 seconds, a SD mechanism will cause high order detonation of the projectile.

Tabulated Data:

DODAC	1305-A787
UNO serial number	0321
UNO proper shipping name	Cartridges for weapons, with bursting charge
Type	HEI-T
Weight (approx)	317 g
Length	8.39 in. (213.11 mm)
Projectile (steel):	
Tracer	Tablet, 1.17 g
Explosive (HEI mix)	120 g
Fuze	PD SD, M594, aluminum
Color	Yellow with red "T" band, black markings
Cartridge case	Steel, M187
Propellant	VTL-1375-502-52 g
Primer percussion	M103

Performance:

Chamber pressure........................ 49,500 psi
Velocity.. 3460 fps, 78 ft from muzzle

CARTRIDGE, 20MM, ARMOR PIERCING INCENDIARY-TRACER, M601

AR 5994

Type Classification:

STD - AMCTC 4762.

Use:

Gun, M139.

Description:

ARMOR PIERCING INCENDIARY-TRACER Cartridge. The tungsten-carbide core is the main part of the projectile, and is the penetrator. The ballistic cap (ogive) contains an incendiary pellet. A tracer tablet is at the base of the projectile. The projectile body is painted black with white markings and with red painted "T's" encircle the ogive (signifying tracer).

Function:

When fired, the weapon firing pin initiates the primer which ignites the propelling charge. Gases produced by the burning propellant propel the projectile. Upon impact with the target, the nose (ogive) ruptures and the incendiary composition ignites on exposure to the air.

Tabulated Data:

Complete round:	
UNO serial number	0009
UNO proper shipping name	Ammunition, incendiary

CARTRIDGE, 20MM, MULTIPURPOSE TRACE SELF-DESTROYING, M940

Type Classification:

TC STD A - Approved March 13, 1989.

Use:

The existing Vulcan Air Defense System (VADS) and Product Improved Vulcan Air Defense System (PIVADS) M246 ammunition is incapable of providing defense against the modern enemy threat at combat ranges greater than 1,600 meters because of inherent performance limitations including poor flight characteristics, self-destroying ranges, and terminal effectiveness. Therefore, the Army decided to pursue acquiring a new round of ammunition for VADS/PIVADS which would exhibit better exterior ballistics and greater lethality than the existing M246 High Explosive Incendiary Tracer Self-Destroying (HEI-T-SD) ammunition.

Description:

MULTIPURPOSE TRACE SELF-DESTROYING Cartridge. The cartridge is an improved fuzeless pyrotechnic initiated 20mm HE cartridge. The projectile consists of a heavy walled steel body charged with explosive mix and an incendiary mix, and an aluminum nose charged with another incendiary mix. The projectile also has safe and arming (S&A), tracer, and self-destroying which is initiated by heat from combustion of the tracer composition. The lack of fuze permits an enhanced aerodynamic ogive shape which results in a reduction in drag factor and reduced time of flight, thereby extending the effectiveness of the VADS from 1,200 meters to 2,000 meters against aircraft targets. The M940 will replace the 20mm M246 HEI-T-SD as the primary air defense cartridge for the VADS and any of its improved versions.

Function:

The projectile consists of a steel body charged with a HE mix, Composition A-4 (MILC-440), and an incendiary mix, Type I (equivalent I-68). The projectile has an aluminum nose charged with Type II incendiary (equivalent I-136). The hardened forebody of the projectile provides for defeat of lightweight armor (3/8 RHA at well over 500 m). The incendiaries provide a built-in delay when initiated on the thin skin of an aircraft, and the projectile explodes approximately 1 foot behind the skin. The M94 cartridge, therefore, is primarily intended for air defense but has a secondary roll against light armored vehicles. The M940 contains a chemical S&A intended to reduce the probability of functioning on a 0.04 aluminum plate at 1 meter from the muzzle. When initiated, all projectile fragments go forward.

CHAPTER 15

25MM CARTRIDGES

THIS PAGE INTENTIONALLY LEFT BLANK

CARTRIDGE, 25MM, ARMOR-PIERCING DISCARDING-SABOT TRACER, M791

TYPE CLASSIFICATION:

STD - MSR 12796010.

USE:

Automatic cannon, 25mm, M242.

DESCRIPTION:

The 25mm M791 is an armor-piercing, discarding-sabot with tracer (APDS-T) cartridge. The cartridge has a steel case crimped to a projectile assembly. The projectile assembly consists of a tungsten penetrator, aluminum windscreen, aluminum base, nylon sabot, plastic nose cap, and tracer pellets. The steel cartridge case contains a percussion primer, booster pellet, and propellant.

FUNCTIONING:

The cartridge is fired when the weapon firing pin strikes the percussion primer which in turn initiates the booster pellet and propellant. The burning propellant produces high-pressure gases propelling the projectile assembly from the cartridge case and igniting the tracer. The rotating band (integral to the sabot) of the projectile assembly engages the rifling of the barrel, causing the projectile assembly to spin. As the projectile assembly exits the barrel, the spin and aerodynamic forces separate the sabot, base, and cap from the projectile (penetrator and windscreen). The projectile is spin-stabilized and penetrates the target solely by kinetic energy.

CARTRIDGE, 25MM, HIGH-EXPLOSIVE INCENDIARY TRACER, M792

TYPE CLASSIFICATION:

STD - MSR 12796010.

USE:

Automatic cannon, 25mm, M242.

DESCRIPTION:

The 25mm M792 is a high-explosive incendiary with tracer (HEI-T) cartridge. The cartridge has a steel case crimped to a projectile assembly. The projectile assembly consists of a hollow steel body, point-detonating self-destruct M758 (PD SD) fuze, HEI mix, steel rotating band, and tracer pellets. The steel cartridge case contains a percussion primer, booster pellet, and propellant.

FUNCTIONING:

The cartridge is fired when the weapon firing pin strikes he percussion primer which in turn initiates the booster pellet and propellant. The burning propellant produces high-pressure gases propelling the projectile from the cartridge case and igniting the tracer. The rotating band of the projectile engages the rifling of the barrel, causing the projectile assembly to spin. As the projectile exits the barrel, it is spin-stabilized to the target. Upon target impact, the point-detonating fuze functions and the high-explosive incendiary projectile explodes.

CARTRIDGE, 25.4MM, DECOY, M839

Type Classification:

STD - MSR 02816005.

Use:

The cartridge is a decoy to provide an effective survival counter-measure for Army aircraft against radar controlled weapon systems.

Description:

DECOY Cartridge. The cartridge is ammunition item consisting of a plastic outer case nominally 1-inch wide x 1-inch high x 8-inches long, a payload made up of approximately 390,000 strands of aluminum coated glass fibers. The payload is sectioned into several bundles of chaff dipoles. There are three different lengths of bundles in the payload. In addition, the item contains a plastic end cap, plastic piston, felt spacer, and impulse cartridge.

Function:

The cartridge is fired by electrical initiation of the impulse cartridge M796. The gases generated by the functioned impulse cartridge causes the piston to expel the chaff payload into the air where it blooms into a radar reflecting cloud that breaks "Lock On" by radar-controlled weapon systems.

CARTRIDGE, 25MM, TARGET-PRACTICE DISCARDING SABOT TRACER, M910

TYPE CLASSIFICATION:

Standard.

USE:

Automatic cannon, 25mm, M242.

DESCRIPTION:

The 25mm M910 target-practice, discarding-sabot with tracer (TPDS-T) cartridge is a training round for the M791 APDS-T. The projectile assembly consists of a steel core, aluminum windscreen, aluminum base, nylon sabot, plastic nose cap, and tracer pellets. The steel cartridge case contains a percussion primer, booster pellet, and propellant.

FUNCTIONING:

The cartridge is fired when the weapon firing pin strikes the percussion primer which in turn initiates the booster pellet and propellant. The burning propellant produces high-pressure gases propelling the projectile assembly from the cartridge case and igniting the tracer. The rotating band (integral to the sabot) of the projectile assembly engages the rifling of the barrel, causing the projectile assembly to spin. As the projectile assembly exits the barrel, the spin and aerodynamic forces separate the sabot, base, and cap from the projectile (core and windscreen). The projectile is spin-stabilized to the target.

TABULATED DATA:

CARTRIDGE, 25MM, ARMOR PIERCING, FIN-STABILIZING DISCARDING SABOT-TRACER, M919

TYPE CLASSIFICATION:

Standard.

USE:

Automatic cannon, 25mm, M242.

DESCRIPTION:

The 25mm M919 is an armor-piercing, fin-stabilizing, discarding-sabot with tracer (APFSDS-T) cartridge. The cartridge has a steel case crimped to a projectile assembly. The projectile assembly consists of a depleted-uranium penetrator, steel fin, nylon obturator, aluminum windscreen, aluminum sabot, plastic nose cap, and tracer pellets. The steel cartridge case contains a percussion primer, flash tube, and propellant.

FUNCTIONING:

The cartridge is fired when the weapon firing pin strikes the percussion primer, which in turn initiates the booster pellet and propellant. The burning propellant produces high-pressure gases propelling the projectile assembly from the cartridge case and igniting the tracer. The nylon obturator of the projectile assembly engages the rifling of the barrel, providing a gas seal. A limited amount of spin is imparted to the projectile assembly. As the projectile assembly exits the barrel, aerodynamic forces separate the sabot, obturator, and cap from the projectile (penetrator, windscreen, and fin). The projectile is fin-stabilized and penetrates the target solely by kinetic energy.

30MM CARTRIDGES

THIS PAGE INTENTIONALLY LEFT BLANK

CARTRIDGE, 30MM, TARGET PRACTICE, M788

Type Classification:

STD.

Use:

Automatic cannon, 30mm, XM230 (U.S.), ADEN MK IV (NATO), DEFA 552/553 (NATO). The cartridge is used in target practice.

Description:

TARGET PRACTICE Cartridge. The cartridge has a blue painted projectile with white markings. The inert/solid projectile is a three piece assembly consisting of steel body with cavity, rotating band, and aluminum nose piece. The cartridge case is aluminum.

Function:

The cartridge consists of an inert, solid projectile without a fuze. No function takes place except penetration of target.

Tabulated Data:

DODAC	1305-B118

CARTRIDGE, 30MM, HIGH EXPLOSIVE DUAL PURPOSE, M789

Type Classification:

STD.

Use:

Automatic cannon, 30mm, M230 (U.S.).

Description:

HIGH EXPLOSIVE DUAL PURPOSE Cartridge. The cartridge consists of a steel projectile body loaded with HMX explosive and spin compensated shaped charge liner, point detonating (PD) bore safe fuze and aluminum cartridge case.

Purpose:

The projectile fuze arms in flight. Upon impact, the fuze initiates the projectile explosive filler. Detonation of the filler charge collapses the shaped charge liner resulting in the formation of an armor-piercing jet. In addition, main charge detonation produces fragmentation of the projectile body resulting in antipersonnel effects in target vicinity.

CARTRIDGE, 30MM, DUMMY, M848

Type Classification:

STD - LCC-A MSR 04826009.

Use:

Automatic cannon, 30mm, M230. The cartridge is used in drills of the weapon mechanism and to test link/delink functions.

Description:

DUMMY Cartridge. The cartridge is completely inert with modified target practice (TP) projectile and cartridge case. Primer and propellant are replaced with threaded steel bolt attached to the base of the projectile body to maintain same weight and balance as the TP cartridge. The projectile body is steel with an aluminum nose.

CARTRIDGE, 30MM, TEST, M883

Type Classification:

STD - LCC-A, MSR 06827003.

Use:

Automatic cannon, 30mm, M230. The cartridge is used in proof testing the weapon and barrel.

Description:

TEST Cartridge. The cartridge is a high pressure test round which provides 120 percent chamber pressure to proof test the weapon and barrel. Case, primer, and propellant are identical to the target practice round. Excess pressure is achieved through a heavier 1018 steel projectile. Ogive is blunt and cartridge case is silvered to distinguish from service rounds.

POINT-DETONATING FUZES

THIS PAGE INTENTIONALLY LEFT BLANK

FUZE, POINT-DETONATING: M505A3

Type .Classification:

STD.

Use:

The fuze is designed for use with the 20mm high explosive incendiary (HEI) and high explosive incendiary with tracer (HEI-T) cartridges against aircraft and light armor.:

Description:

The point-detonating, single-action nose fuze is intended to function upon impact with the target. The fuze is used with the following HEI cartridges: M56A3/A4, M97A2, M210, M242 and M246.

Function:

Upon impact, the fuze initiates the HE filler and disperses the incendiary filler:. The fuze arms in flight. Its delay is 10 to 35 feet.

Tabulated Data:

Length (max) ....1.23 in. (31 mm)

THIS PAGE INTENTIONALLY LEFT BLANK

FUZE, POINT-DETONATING, SELF-DESTROYING: M758

Type Classification:

STD - MSR 12796010.

Use:

The fuze is designed for use with the 25mm, high explosive incendiary with tracer, M792 cartridge, fired from the M242 cannon.

Description:

The point-detonating (PD), self-destroying (SD) M758 fuze is a delayed arming, PD SD type which also features graze impact sensitivity against hard and soft ground media as well as super-quick functioning upon target impact. The fuze consists of an ogive assembly crimped to a base assembly which houses a piston assembly, a piston spring, a body assembly, and a setback spring. The ogive assembly consists of a nylon probe within a steel ogive crimped to a steel probe cap while the base assembly consists of a lead charge within a steel base. the piston spring separates the piston assembly, consisting of an aluminum piston base, a piston seal, a seal ring, a steel restrictor, and a steel firing pill from the body assembly consisting of a nylon upper body, an aluminum lower body, a steel roller weight, a body, a zinc rotor; a detonator, two steel lockweights and lockweight springs which, in turn, separate from the base assembly by the setback spring.

Function:

Starting from the safe condition, acceleration forces, associated with projectile launch, cause the body assembly and piston assembly located within the fuze ogive to be simultaneously set back to the rear of the fuze against the setback spring. Air originally in the bottom of the fuze is forced through ports into the chamber above the piston. The high spin forces, which occur almost simultaneously with the setback forces, serve three purposes. The spin effect causes two lockweights to move against their firing pin which keeps the motor in a safe position. Spin also causes two balls to move outward into groove located around the inner part of the ogive, locking the body assembly rearward against the compressed force of the setback spring. Spin also causes a rubber piston seal to flare out against the bore of the ogive, resulting in necessary piston scaling action. As the projectile leaves the muzzle, the acceleration force dissipates and the piston becomes free to move forward under forces exerted by the piston spring. The rate of piston movement forward is controlled by air being forced through a porous metal restrictor. This action provides the required arming delay time to meet the fuze no-arm and all-arm requirements. As the piston approaches the forward position, the firing pin is withdrawn from the

rotor, allowing it to rotate to the armed position. Centrifugal force acting on the roller weight causes it to move into a groove and lock the rotor in the armed position. The fuze is fully armed when the detonator is in line with the fitting pin and lead assembly. The fuze functions under conditions of direct impact, graze impact or self destruct (non-impact). Direct impact with the target causes a super-quick function of the fuze due to the crushing action of the nose probe. The nose probe is driven into the piston assembly, moving it rapidly rearward. The firing pin, as part of the piston assembly, is thereby driven into the detonator and the explosive train is initiated. Function at low graze angles can occur in two ways. On soft targets where the projectile tends to enter the target, the nose probe is crushed driving the piston firing pin into the detonator. On low angle or graze impacts on hard targets, deceleration of the projectile and spin decay occurs.

Spin decay reduces the centrifugal forces acting on the self-destruct balls and inertial force acts on the body assembly due to projectile deceleration. This, coupled with the stored energy of the setback spring, overrides the force exerted by the self destruct balls and the body assembly is driven forward rapidly. The detonator contacts the filing pill and begins initiation of the explosive train. If no contact is made with a target, the fuze will cause the projectile to function by self-destruct action after a predetermined flight time. Projectile spill decay reduces the centrifugal force acting on the self-destruct balls. The stored energy in the setback spring overrides the holdback force of the balls and forces the body assembly forward to drive the detonator into the firing pin. Initiation of the explosive train occurs, and the projectile is detonated while still in flight.

FUZE, POINT-DETONATING: M759 (XM714E6)

Type Classification:

STD

Use:

The fuze is designed for use with the 30mm high explosive dual purpose (HEDP) cartridges fired from the M230 automatic cannon.

Description:

Fuze M759 (formally designated as the XM714E6) is a point-detonating type with detonator and spitback charge. It is used with HEDP cartridge M789.

Function:

Prior to launch, the fuze detonator is housed in the rotor with the rotor locked in the safe position by the firing pin tip and two lockweights. On setback, the piston assembly (with firing pin) and body assembly (with detonator and rotor) are moved to the most rearward position by the firing pill tip and two lockweights. As the fuzed projectile exits the gun muzzle, spin environment causes the lockweights to retract from the rotor and the two steel balls to engage the ogive groove, locking the body assembly in the position it had achieved at setback. In addition, spin causes the piston seal to flare and engage the ogive sidewalls which eliminates the air flow path between the ogive and piston. Movement of the piston assembly (firing pin) to the forward or armed position is delayed due to the regulated flow of trapped air through the restrictor until the projectile has traveled a minimum of 15 meters from the muzzle. After retraction to the firing pin from the rotor (last safety lock), the spin causes the rotor (with detonator) to rotate to the armed state, i.e., stab detonator aligned with firing pin and lead cup assembly. As the rotor achieves the armed position (150 in), the roller weight moves outboard from the rotor and engages the detent from the lower and upper bodies thus locking the rotor in armed state. Upon target impact, the probe nose piece is driven into the ogive forcing the piston assembly (firing pin) aft. The firing pin stabs the detonator and its explosive initiates the lead cup assembly explosive which, in turn, ignites the main charge.

CHAPTER 18

ACCESSORIES

GENERAL

a. Accessories. Accessories used with small arms ammunition, such as clips and metallic belt links, are described in this chapter. These items are listed and packed as indicated in SC 1305/30-IL and also listed in TM 9-1305-20120&P

b. Magazines for Pistols and Other Small Arms. Magazines for pistols and other small arms do not come preloaded from the ammunition supply point. The magazine for the submachine gun M3 and M3A1 holds 30 rounds of ammunition and this also is not preloaded.

c. Metallic Link Belts. Ammunition for use in machine guns is issued in metallic link belts. Link belts are made of units of cartridges and links. Each link has two loops fitted around a single cartridge and one loop fitted around an adjacent cartridge. Each cartridge in a metallic link belt has two links attached to it, except the end cartridges. Cartridge links are made of steel which is processed to prevent rusting. They are manufactured and tested to assure satisfactory ammunition feeding and functioning under all service conditions.

THIS PAGE INTENTIONALLY LEFT BLANK

ACCESSORIES FOR CARTRIDGES, CALIBER .50

Links, Closed Loop, M2 and M9:

Caliber .50, M2 and M9 links (fig. 18-7) are manufactured with closed loops. When assembled with the cartridge in belts, the links fit on the cartridge shoulder. The tapered front loops of the links are positioned firmly on the cartridge shoulder to hold the cartridge in proper alignment for feeding into the weapon. The design required the cartridge to be extracted from the rear and dropped into position for moving into the chamber for firing. Weapons designed for the links require additional space in the rear of the receiver for retraction. M2 and M9 links are used with the M2 machine gun only.

Link, M2 (NSN 1305-00-096-3181(A640))
Link, M9 (NSN 1305-00-078-8463(A641))

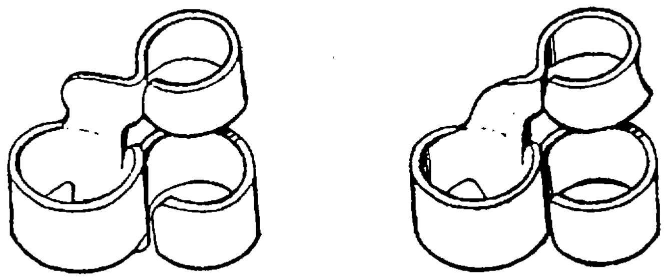

Figure 18-7. Caliber .50, M2 and M9 links (closed loop).

Link, Open Loop, M15A2:

The caliber .50, M15A2 link (fig. 18-8) is manufactured with partially open loops and has a positioning finger on one side which snaps into the extractor grooves of the cartridge to retain the cartridge in proper feed alignment. The link design permits a portion of bolt to ride through link loop openings and push the cartridges forward and out of the link into the chamber for firing. The M15A2 link is used with the M85 machine gun.

THIS PAGE INTENTIONALLY LEFT BLANK

ACCESSORIES FOR CARTRIDGES, 5.56MM

Clips:

Cartridges for the 5.56mm M16 rifle are assembled in 10-round clips. The clip (fig. 18-1) consists of a channel-shaped body containing a spring with narrow tabs at each end. After the clip is filled, the tabs are bent at right angles to the extrator rims of the end cartridges to hold them securely in the clip (NSN 1305-00-0524377).

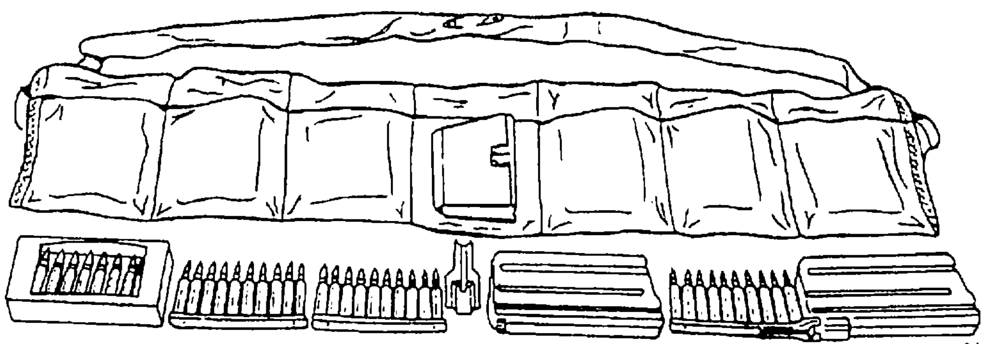

Figure 18-1. Cartridge clips and bandoleer for 5.56mm cartridges.

Link M27:

The M27 link (fig. 18-2) is a reduced size of the 7.62nmm link M13. The body link fits into the extractor groove on the cartridge case. The U.S. Navy, uses the link with the Stoner Machine Gun M63. The U.S. Army designated its use foil the M249 Machine Gun. The link is used with M855 Ball Cartridges, M856 Tracer, and M200 Blank only.

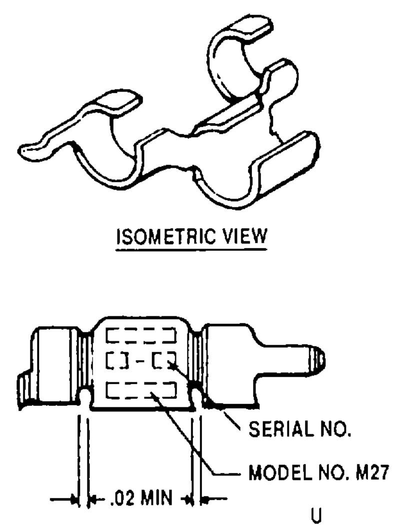

Figure 18-2. M27 link for 5.56mm.

Other Accessories:

THIS PAGE INTENTIONALLY LEFT BLANK

ACCESSORIES FOR CARTRIDGES, 7.62MM

Clips:

Cartridges for the 7.62mm M14 rifles are assembled in 5-round clips (fig. 18-3). All cartridges are packed in bandoleers with separate magazine fillers. The clip, which consists of a channel-shaped body containing a spring, facilitates loading of magazines. Loaded clips are fitted into the top of the rifle receiver and the cartridges are pressed into the magazine assembly. A magazine fillet; which adapts clips to the magazine, allows individual magazines to be loaded with clipped ammunition. The clip is 2.36 inches long. The 7.62mm ammunition and clip are shown with the M2 bandoleer in figure 18-4 and with the M4 bandoleer in figure 18-5. The M4 bandoleer is for belted ammunition for machine guns (NSN 1305-00-914-7912).

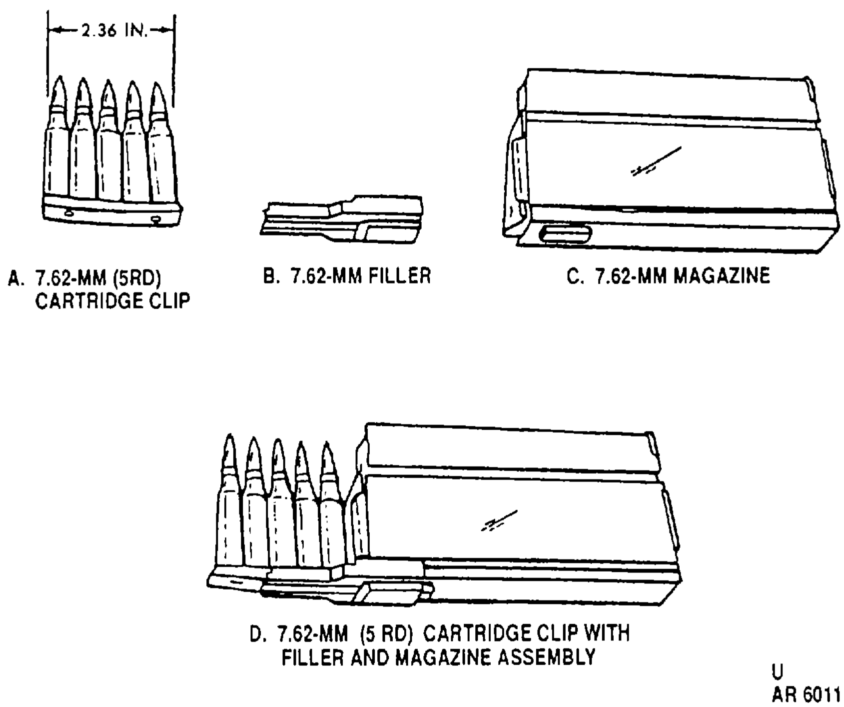

Figure 18-3. Cartridge clip, filler, and magazine assembly for 7.62mm cartridges.

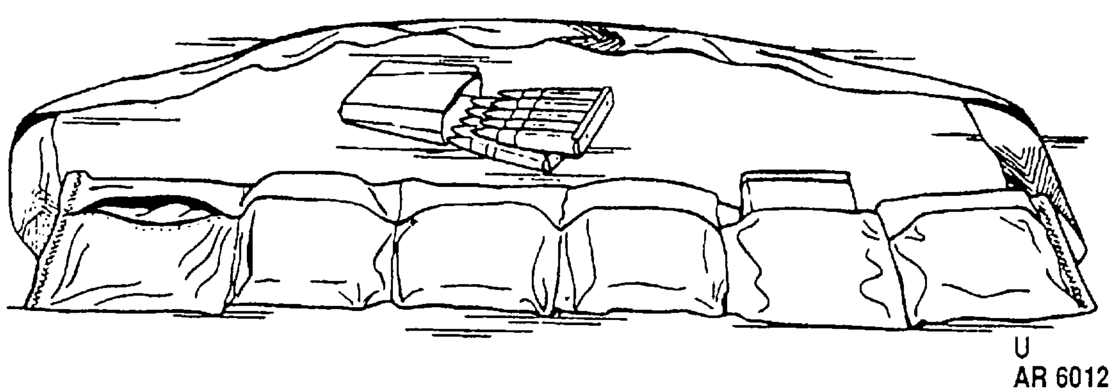

Figure 18-4. M2 bandoleer for 7.621imm cartridges.

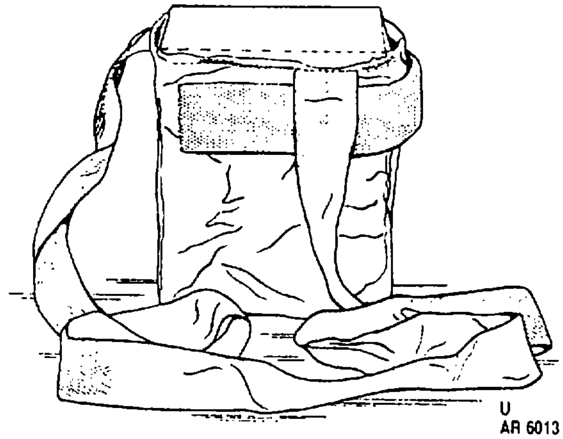

Figure 18-5. M4 bandoleer for 7.62mm cartridges.

Link M13:

The 7.62mm M13 link (fig. 18-6) is manufactured with partially open loops and has a positioning finger on one side which snaps into the extractor grooves of cartridges to retain the cartridge in proper feed alignment. The link design permits a portion of the bolt to ride through the link opening and push cartridges forward and out of the link into the chamber for firing.

Weapons using this type link are designed and manufactured with a short receiver, i.e., M60, M73, M219, M240, and M134 machine guns (NSN 1305-00-752-7815).

Other Accessories:

Fillet; Magazine.
Bandoleer; M2 (NSN 1305-00-984-1125).
Bandoleer M4 (NSN 1305-00-079-3579).

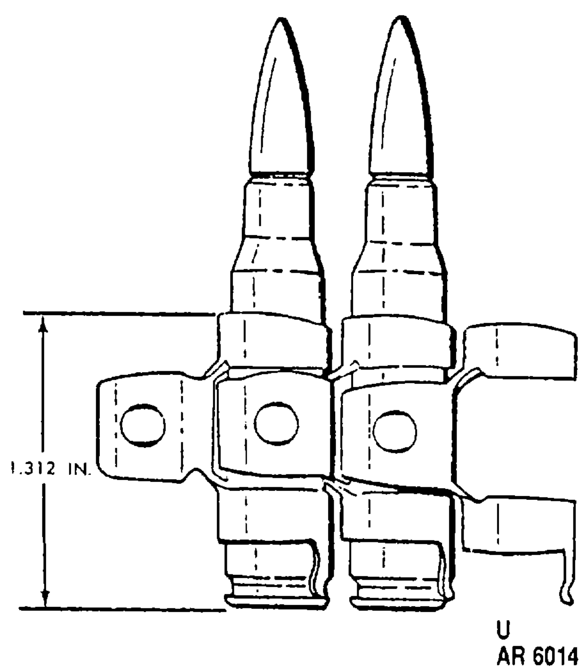

Figure 18-6. Cartridge M13 link for 7.62mm cartridges.

ACCESSORIES FOR CARTRIDGES, 20MM

Link M10:

The M10 link (fig. 18-9) is utilized in the M3 and M24 belt-fed automatic guns. The link is of steel and the belt is formed by the placement of cartridges within the links. The link is self-separating when the cartridges are removed during the gun feeding cycle. The metallic link can be used to make up belts for either right-hand or left-hand feeding of the gun. A cartridge metallic-link filler is used at the end of the belt when it is desired to load belts for either double-loop left-hand feed or double-loop right-hand feed. The purpose of the link-filler is to close the single loop when it is at the end of the belt to prevent snagging in the feed chute (NSN 1305-00-028-4869).

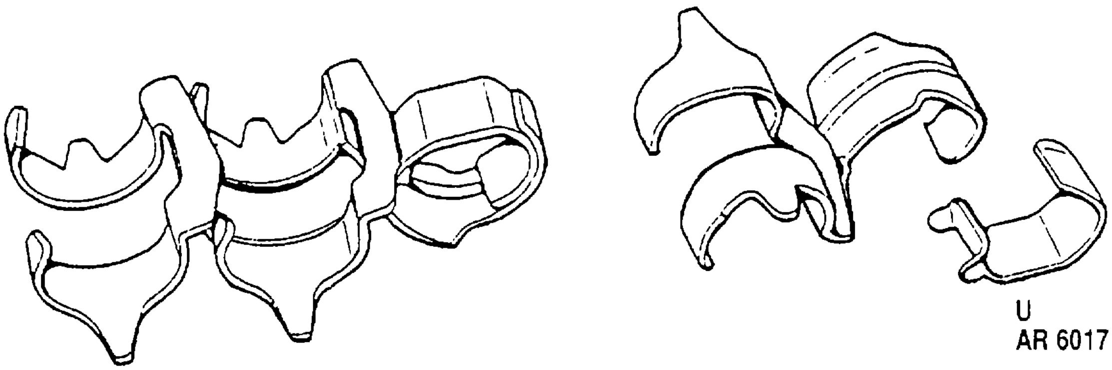

Figure 18-9. M10 link for 20mm cartridges.

Link M12:

The M12 metallic link (fig. 18-10) is used in belt-fed gas-operated M39 series automatic aircraft guns. The ammunition belt is formed by connecting a specified number of links together and then inserting a cartridge for each link. The link is self-separating when cartridges are removed during the gun-feeding cycle. The M12 is an end loading link and is linked for either the right-hand or0 left-hand feeder (NSN 1305-00-541-0021).

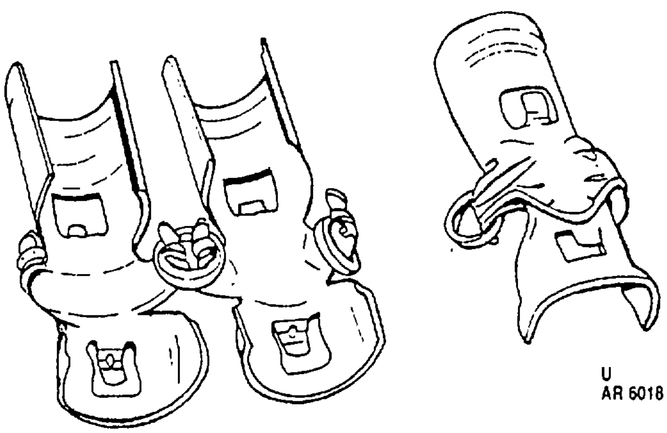

Figure 18-10. M12 link for 20mm cartridges.

Link M14A2:

The M14A2 link (fig. 18-11) is used primarily for linking 20amm ammunition for belt-fed M61 automatic guns and loading of ammunition into linkless feed systems used in aircraft and ground defense vehicles. The link is self-separating when cartridges are removed during the feeding cycle (NSN 1305-00-935-9219).

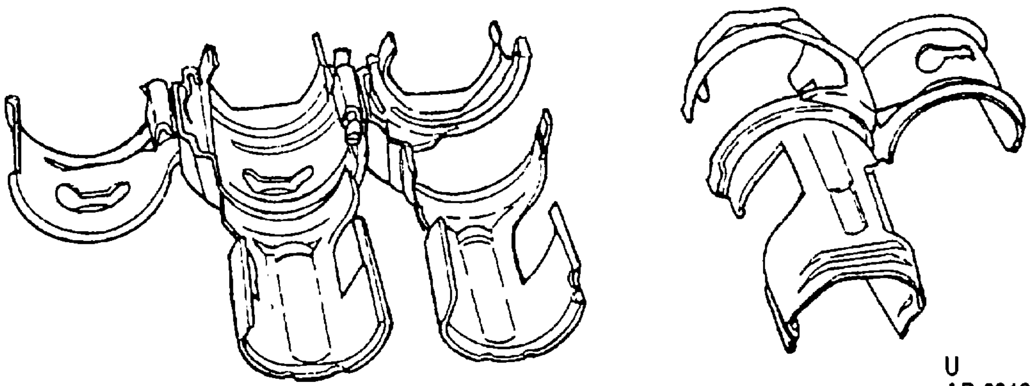

Figure 18-11. M14A2 link for 20mm cartridges.

Link M17A2:

The M17A2 link (fig. 18-12) is used for linking 20mim ammunition for belt-fed M61 automatic weapon system in the B52 G & H aircraft. The link is self-separating when the cartridge is removed from the link during the feeding cycle,

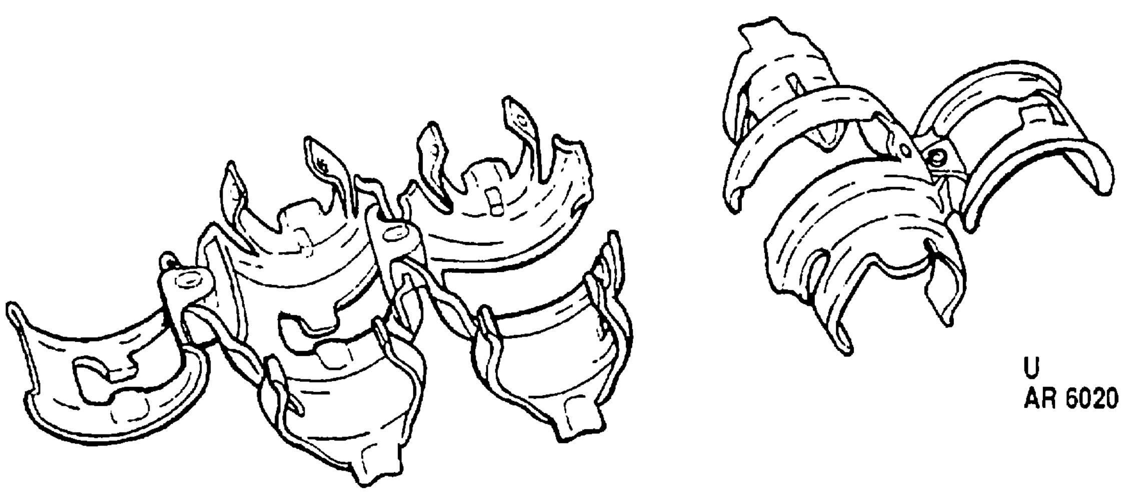

Figure 18-12. M17A2 link for 20mm cartridges.

Link M24 and M22:

The M24 link (fig. 18-13) is a metallic link for use with the following 20mm cartridges: M206A1 Target-Practice, M599 High-Explosive Incendiary Tracer, and M601 Armor-Piercing Incendiary racer. The European (German) DMI/DMIA link is also used for these cartridges. The DMI/DMIA link is used with the HSH20 seriers. The M22 link is for U.S. Air Force use only. It is used to upload their linkless system. It is reusable and does not disintegrate.

Link, M22 (NSN 1305-00-926-1939).

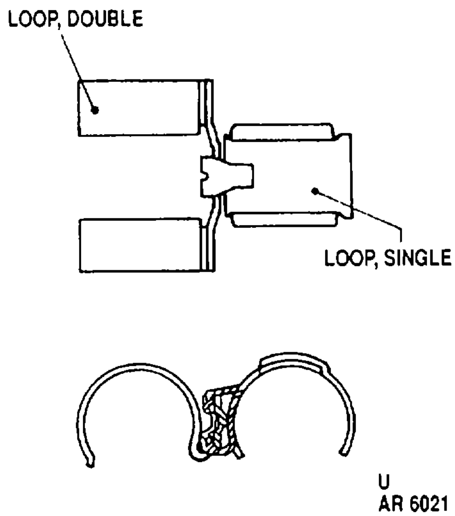

Figure 18-13. M24 link.

ACCESSORIES FOR CARTRIDGES, 25MM

Link M28:

The M28 link (fig. 18-14) is a two piece assembly intended to hold and link the 25mim ammunition for guiding the ammunition through the weapon system. The assembly consists of hardened steel main and pivot links hooked together and contoured accordingly for its intended purpose. The Swiss Oerlikon link and the M28 male dimensionally identical.

Link M29:

The M29 link (fig. 18-15) is 1050 steel with type Z (link) phosphate coating. It is used for interoperability with the NATO ADEN/DEFA weapon systems) (NSN 1305-01-078-5505).
